

# John's Big List Of Game Cheats & Tips.

Welcome to my collection of various video game related hints that I've accumulated over the years. These are all in alphabetical order. This isn't going to include stuff like the entire list of moves for fighting games either. If you have any other cheats or stuff that's "unlockable" for the PAL versions of these games and you've tested it yourself to make sure it works, let me know, & I'll add it to this list. You can also let me know if you find any cheats here that don't work or are different, & I'll retest them.

I refer to all the control pad buttons at the back (the ones that face your T.V.) as the Shift buttons, whether they're analogue or not, as that's what they were called for the Saturn. But there are cheats and tips for games on most of my systems.

Any cheats I find that don't work, or are unconfirmed or from different regions that don't work on the PAL (— apart from PC & Japanese games of course —) games will not be added.

(You can also grab the video files from NiGHTS and Christmas NiGHTS as there are ways to convert these to be seen on your computer. Although you need a special program to combine the ADP & CPK files together.)

You can set your Saturn clock and calendar to achieve various effects in Christmas NiGHTS.

## Cool Spot (Mega Drive)

- In the options area, press A, A, B, B, C, C, C, C, B, B, A, A, A, A, B, B, C, C. You can hear every button press, so it makes it easier. (If you leave the hand on the difficulty selection, it should revert to what you had set 1st after all the button presses.) A picture of Dave Perry will briefly appear and then a run down on the memory usage of the game as well as cheats at the bottom of the screen.
- During a level, pause and press A, B, C, B, A, C, A, B, C, B, A, C to skip it. You don't need the other cheat to do this.

## Crazy Taxi (Dreamcast)

- If you're a little tired of the usual start to Crazy Taxi, you can start from another part of the city, with Another Day. When you're going to pick your driver, 1st press Right Shift, and then again as you press A. You should hear a toot sound to confirm it.

- You can also press Start during car selection for a time attack mode.
- If you enter your initials as V.R or V.F, you can hear a tune from Virtua Racing or Virtua Fighter. There are a lot more also, such as A.B, A.Y, AKI, ANI, ASA, AO., BNB, DEK, DST, E.R, EXN, G.F, GDA, GLC, GPR, H.O, H.S, HSB, IGA, ISO, J.B, J.M, JIM, K.M, KAG, KAZ, KEN, KOS, KOU, .KK, K.T, LAU, LGA, M.M, MAS, MIT, MMM, NAG, NAK, O.R, OKA, ORS, OSI, P.D, P.P, PAI, QTT, R.M, S.B, S.C, S.F, S.H, SAO, SDI, SEX, SHO, SKH, SMG, T.B, TAK, TET, TOR, TRS, UME, VMO, W.H, VFT, YAM, YAN, YOJ & YUI. Some of them are initials for Virtua Fighter characters.
- If you stop your car in front of the giant statue of Jeffry on the Expert track and then press X, you can get him to turn around.
- To play as the horse, you need to come 1st on all 3 courses on normal difficulty. Then you need to come 1st on the Advanced track using the black car.
- To get Horse 2 (with the baby sized one behind), change the mode to Endurance and win with the

1st horse. You can then choose the 2nd version in the Saturn mode.

- For karaoke mode, in the Arcade mode, hold up, while choosing your car's transmission type and during the track selection.
- For an extra hard mode, let the attract mode run through once, and then when it says SEGA again, press Up, Up, Down, Down, Left, Right, Left, Right, A, B, C. You'll hear a checkpoint sound. There should be a small M in the top left corner of the screen during the race also.

- To unlock the Pywackett Barchetta car, complete a race with the 1st 4 available cars in 1st place most likely.
- To get the Pywackett Barchetta Super, start up a normal 2 lap race, and then turn around and drive the course in reverse. This is best on Circuit Pixie with 10 cars, so that you don't crash into too many as they come at you.
- To drive the Unicorn car, you need to place 1st at the end of the championship mode.
- To get the Red Cat car, you need to rack up about 20 hours of play time, I think.

- Apparently if you use this button combo as Zack: Down, Down + Free + Punch + Kick, in his reflective outfit to do a taunt, the top of his head will light up.

### Fighters Megamix (Saturn)

- To get the school girl style of Candy, hold X as you choose her. You need to complete the novice line up 1stly.

### Mortal Kombat 2 (Mega Drive)

- In the options area, leave the arrow on DONE, and press Down, Left, Right, Down, Right, Left, Left, Right, Right to enable a new option called Test Modes. In here you can tweak all sorts of options in the game.

- To perform a Fergality, enable *Oooh, Nasty!* on section 3 of the Test Modes. Set the stage background to 6 and then continue on back. At the character select screen, choose Rayden. Change both things in there and it will put the game's speech and text into English. ### Sega Touring Car Championship (Saturn)

- Set your date to the 13th of February 1998 for another event plus Hit & Run tracks.
- Put your date on the 1st of April 1998 for an April Fool track.

### Sonic 3 (Mega Drive)

- At the very start of the game, just after the Sega logo goes black, and before Sonic fully zooms onto the screen, press Up, Up, Down, Down, Up, Up, Up, Up. It’s very tricky to get it all in, in the short space of time, but it does work! This will open up a 3rd option on the title screen called *Sound Test*. Go into here and you’ll see a screen like this:

Press A + Start on the level you want to play and it will enable a special mode that lets you do some pretty funky stuff. Press B to change Sonic into an object, A to change the object and C to make a duplicate of it to be placed in the level. (You can add in extra rings, star posts, springs and the like.) Then press B to return Sonic to normal. In certain cases, such as when Sonic is on moving objects, this can crash the game, so be careful! The score will be messed up with hexadecimal numbers and letters, having some kind of representation of Sonic’s

position in the level. You can’t play any of the Sonic & Knuckles levels either, so don’t get excited if you only own Sonic 3.

- On the Launch Base zone, position Sonic between the alarms at the start of the level. This will cause a Flybot767 to drop down and attack you. The trick though is to have a Spin Dash Attack going while you’re between the alarms. This will kill all the Flybot767s that come towards you and eventually the score will begin to increase significantly, up to the point where you’ll start getting extra lives quite quickly. You can keep getting more lives until the time runs out, and then begin the level fresh with plenty of extra lives to see you through to the ending.

### Sonic 3D: Flickies’ Island (Saturn)

- At the title screen, press Up, Right, A, C. During the game, pause, and then press A to skip an act, B to skip a whole zone, C to skip right to the end, X for an extra life, Y to get a medal and Z to get all the Chaos Emeralds.

### Sonic & Knuckles (Sonic Jam [Saturn])

- In Mushroom Hill Zone, get onto one of those mechanical lifting doodads and stay there. Now press Left, Left, Left, Right, Right, Right, Up, Up, Up. You should hear a ring noise. Next pause and press A. Instead of doing the Continue option, the game will reset back to the title screen. When you get to choose your character, hold A & press Start. You should get a screen like the one below.

The little number 03 under Angel Island means you're playing as Knuckles. Change it to 00 for Sonic with C.

### Sonic Jam (Saturn)

· Along with the artwork you'll find on the CD, you can also find several AIF files that make up the game music and TIF images of the instruction manuals.

### Sonic R (Saturn)

- To play as the same character in 2 player mode, player 1 should choose 1st, and then player 2 needs to select the same character and press X + Y + Z.
- To get Dr. Robotnik, you need to finish the Radiant Emerald course in 1st place.
- To get Super Sonic, collect all the emeralds as you would normally do. You can then press Up on Sonic to get his Super version.

- During replays, press guard to go into slow motion.

### The Lion King (Mega Drive)

- Go into the options area and then press Right, A, A, B, Start to enable the cheat mode and level select options.

- For a dirt track mode, hold the L & R Shift buttons when selecting the track you want. It will say the name of the track + Rally. You need the other cheat above for this to work.
- If you set your Saturn to German, the game will have metric measurements. Huzzah! Surprisingly, it will also be in German.

## Virtua Cop 2 (Saturn)

- To jump straight to File 4, or stage 4 if you prefer to call it that, keep shooting at the red arrow on the stage selection screen for stage 1. When the time runs out, you'll start on the last level. Quick and easy!
- To get more options, finish the game on something harder than easy. You can get a big head mode once you've racked up 58 plays.
- To get all the extra options the easy way, have your Virtua Gun in the 1st controller socket and a regular pad in the 2nd one. Use the control pad at the title screen to do the following button presses: Up, Down, Up, Down, A, X, B, Y, C, Z.
- To change the way the enemies appear, you need to get to the extra OPTIONS PLUS menu. On EXIT, hold down and press Start. (It should jump to the arrows I think.) Quit from there and you should be back at the title screen. Then on ARCADE, press Start on the gun while holding Right Shift on the control pad.
- To choose a different cop, hold down X, Y or Z when choosing the stage you want to begin on. X

will give you Rage, Y gives you Smarty and Z gives you Janet.

### Virtua Fighter 2 (Saturn)

- To play as Dural, press Down, Up, Right, Left + A on the character selection screen.
- For the gold version of Dural, press Down, Up, Left, Right + A.
- For a slow motion replay, press A + B + C once you win, until the replay starts.
- For older music for Jacky, press Right Shift on control pad 2 and for Sarah, press it on controller 1.
- If you complete the game in Expert mode, you can then get another options screen, which lets you tweak things further.
- To get your fighter's alternate costume, press Up, when choosing them.

### Virtua Fighter 3 t.b. (Dreamcast)

- You can play an alternate intro song, by pressing Start on both the player 1 and player 2 control pads after the SEGA logo bit. You probably need to hold them down until the introduction starts, but be careful not to actually go to the title screen, or you'll miss it.
- In Training Mode, hold Start and then press A to select a stage with a different background.
- To play as Dural, press Down, Up, Right, Left, Start at the character selection screen. The current character's head should change to Dural's. Press A for the silver version, and Start + A for the gold version.

- To play as the alphabet fighter from the name entry dealie, start in the Normal mode, highlight Akira and press Start, then do the same with Lion, followed by Pai and then choose who you really want to fight as, and press A. They'll now take on the form of the alphabet chap. As your health goes down, the letters change from A to Z. Once you're knocked out, it will say END.
  - To fight against the alphabet fighter, substitute Lau for Pai in the above cheat.
  - If you win with an Excellent in the desert stage with Shun, you may get to see a snowman in the replay.
- As Kage or Jacky, press Down + Punch + Escape + Guard when you get an Excellent win. They'll do a peace sign, and if Kage has his 2nd outfit on, a metal pan may clobber him one on the head.

### Virtua Racing (Saturn)

In the Amazon Falls track, you should find a secret route. When you get to the 2nd hill area from the start line, you should spot a red & grey barrier on the right. (Not far from the Easter Island style rock heads.) It's a bit hard to see, but if you drive through it, you should come to another part of the track. This takes you right through the middle of the circuit, but it's not counted when you drive through it, so you'll have to complete the rest of the lap properly.
